

WHAT IS CLAIMED IS:

1. An electric power steering apparatus
comprising:

5 a steering shaft having its upper end to which a
steering wheel is fitted;

a steering column rotatably supporting said
steering shaft, tilting about a pivot as a fulcrum
and moving telescopically together with said steering
shaft in axis-directions;

10 an electric assist motor unit attached to said
steering column and serving for a steering assist of
said steering wheel; and

tilt/telescopic adjustment means for fixing said
steering column in a predetermined angular position
15 and fixing said steering column in a predetermined
axis-directional position,

wherein said pivot is disposed between said
electric motor unit and said tilt/telescopic
adjustment means.

20

2. An electric power steering apparatus
according to claim 1, wherein said tilt pivot is
disposed more upwards than said steering shaft.
